INTRODUCTION

Awareness of professional and community resources available to address addictions is critical in dealing with the devastation of substance abuse. In order to enhance public awareness of addiction services and programs available to Manitobans, the Alcoholism Foundation of Manitoba has complied this **Directory of Manitoba Addiction Services and Programs**.

The purpose of the Directory is to provide a resource manual of addiction prevention and treatment services for social service organizations, community groups, health professionals and concerned citizens. Updates of the manual will be prepared bi-annually.

I am proud to acknowledge the hard work and energy of the many community volunteers, health care and social service professionals identified in the Directory for their invaluable contributions in the addiction field.

I also want to express my sincere gratitude to the AFM staff, particularly our Drug and Alcohol Awareness and Information Directorate, for compiling this Directory. I am confident that informational publications such as this will enhance all of our efforts to resolve the pervasive problem of alcohol and other drug abuse.

James Toal
Chairman, Board of Governors
Alcoholism Foundation of Manitoba

October 1990

This Directory has been compiled for the use of individuals wanting information on alcohol and other drug resources in Manitoba.

Listing of any organization or resource in this Directory does not imply legitimization, authorization, or endorsement by the Alcoholism Foundation of Manitoba.

All groups and organizations listed have been contacted and agreed to participation in the Directory.

How to use this Directory:

The Directory lists those agencies/organizations/groups in Manitoba who provide alcohol and other drug treatment, prevention, education or other services to the citizens of Manitoba. The information is listed alphabetically along with a Subject Index which lists each group according to type of program or Health Region served.

The listing includes the name of the organization, name of the specific program if indicated, address, telephone number, contact name if available, Health Region(s) served, and program description.

If the name of the organization is known, refer to the alphabetical listing.

If the name is not known, refer to the Subject Index. For example, to find a residential treatment centre in the Norman Region refer to either the Health Region Served listing or Residential Facilities. As an example, the Rosaire House Addiction Centre is listed as a residential facility in the Norman Region.

The aim of this Directory is to provide comprehensive information in a useful format. Readers are encouraged to submit their suggestions, additions or updates to:

Coordinator
774-3477
775-7660 (hotline)

Program Description:
The program is designed to assist Manitoba nurses (RN, RPN, LPN) with any problem which puts him or her at risk. Nurses with mental, legal, financial, emotional, physical and spiritual problems (including chemical dependency) are assessed and referred to effective resources. The program provides confidential peer assistance with short-term intervention, follow-up and education. The program offers nurses, employers and other health care professionals an understanding of nursing work-life issues and the special needs of this group of professionals.

Program:	Prevention/Education
Target:	RN, RPN, LPN
Health Region:	All Manitoba

Program:	Treatment
Target:	Female Only
Health Region:	Winnipeg

APPENDIX A

ALCOHOLISM FOUNDATION OF MANITOBA

THE ALCOHOLISM FOUNDATION OF MANITOBA

The Alcoholism Foundation of Manitoba Act was passed in 1956. The Act authorized the provision of facilities and services for treatment and rehabilitation of alcoholics, counselling, education, prevention and research.

In 1976, as a result of the recommendations of the Banmen Report of 1974, the Foundation expanded its mandate to include public health issues related to the use of alcohol and other drugs, prevention, and the funding of private agencies working with clients with alcohol-related problems.

Corporate Mission:

The Alcoholism Foundation of Manitoba is the provincial authority responsible for providing prevention and treatment programs related to chemical misuse and dependency to individuals and communities; for conducting research into the negative effects of substance abuse; and in so doing, for promoting the health and well-being of Manitobans.

Corporate Roles:

As a service provider the AFM conducts intervention, prevention, treatment, rehabilitation, research and evaluation programs, including public information, education and training services; and operates clinics, hospitals centres and offices to deliver such programs.

As a sponsor and funder the AFM enters into agreements with, and makes grants to, government and non-government agencies conducting activities consistent with the mission of the Foundation.

As a leader the AFM provides expertise, encouragement and motivation to the community, government and non-government agencies in addressing the problems associated with chemical misuse and dependency; and thereby promotes the health, independence and potential of Manitobans.

Structure:

The Foundation is a provincial crown agency governed by a 15-member Board of Governors appointed by the Lieutenant Governor-in-Council. Regional Advisory Boards are also a part of the AFM structure. These regional Boards are made up of interested and informed citizens within the Western and Northern Regions who act in an advisory capacity to the Regional Administrator and the Board of Governors. The efforts of these concerned and committed Board members play a vital role in meeting the needs of Manitobans in the alcohol and other drug abuse field.

Treatment services and prevention and education services are available across the province as developed and delivered by the Program Delivery Directorate. These services are administered through three regional offices in Brandon (Western Region), Thompson (Northern Region) and Winnipeg (Winnipeg Region). Due to regional differences, availability and programs may vary from location to location.

Awareness and information services are developed and offered through the Drug and Alcohol Awareness and Information Directorate. These services include Library, Research, Media and Program Audit services.

Accountability for the Foundation's annual budget to the Provincial Government is undertaken by the Finance Unit. The Finance Unit plans, controls and operates the accounting, audit, budgeting, finance and purchasing systems of the Foundation. Foundation staff are located in both urban and rural locations throughout Manitoba. The Personnel Unit provides support to all staff and is accountable for the development, implementation and maintenance of the human resource management program.

The Foundation also supports nine external addictions agencies. These agencies provide a range of services to persons experiencing the effects of the abuse or misuse of alcohol and other drugs. The support of these agencies is in the form of funding grants and encouragement for developing programs.

AFM SERVICES

Treatment Services for Men and Women

Intake Services: Assesses individuals for chemical use and makes referrals to appropriate resources, such as an AFM service, another external agency, or a self-help group. All treatment clients are channelled through Intake Services, with the exception of referrals to the Impaired Drivers Program, Affected Persons Program, Women's Program, and the Youth Program which provide their own intake services.

Non-Residential Treatment: A program designed for individuals with family and community supports who do not require the intensive daily intervention of a residential treatment program. Individual and group counselling sessions are designed to support and stabilize the individual in the community. Services include aftercare following treatment, which links the client with community supports and self-help groups, and follow-up services.

Day Treatment Program: A 14-day program for both men and women designed for those persons who do not require more intensive residential treatment programming, but who do require more assistance than the adult non-residential program. The Day Program includes daily group sessions which focus primarily on skill development to support recovery. Following the 14-day portion of the

program, clients enter a three-month aftercare component and subsequent follow-up for six months to two years.

Affected Persons Program: An educational and support program for significant other persons affected by the chemical use of a family member or friend. The program consists of group sessions offered during the day and evening. Individual counselling sessions are also available.

Family Services Program: This program offers group-oriented supportive and psycho-educational and experiential services to people coping with the chemical dependency of friends, relatives or other significant people in their lives. The primary target audience is the family and significant others of clients currently in AFM treatment. The program consists of informal peer discussions in a therapeutic environment, goal setting interview with Family Services staff, special needs conferences with professional staff, lecturette and/or experiential process session, aftercare planning, and therapeutic reading assignments and pamphlets.

Men's Residential Treatment Program:

A 21-day residential treatment program followed by continuing care for clients who require intensive intervention due to chemical dependency. The program addresses the addiction problem and the reintegration of the individual into the community through the support of family, friends and community resources. Residential facilities are located in Winnipeg, Brandon, Thompson and Ste. Rose du Lac.

Women's Residential Treatment Program:

A 15-bed residential treatment program which offers group and individual counselling, lectures, films and discussion groups for women. The program focuses on issues specific to women and recovery. Rehabilitation counsellors are actively involved with the client on a follow-up basis for up to two years. During the rehabilitation process, links are established with various self-help and community groups for continued support.

Women's Centre for Substance Abuse:

In Winnipeg, the Women's Centre focuses on issues specific to women and recovery. Many of the programs described herein are available to women through the Women's Centre.

Prevention Services:

Community Education: Offers a variety of training courses available to the general public, professionals, para-professionals and students. Included in the selection are courses specifically for Native persons and Native counsellors who wish to gain knowledge and understanding of alcohol and other drug addiction. Staff are also available to provide sessions on an occasional service request basis and will develop and present training on specific topics for specific audiences.

Drugs and the Aging: A program designed to help educate the elderly about drugs and the effects of aging on drug use. The program examines problems associated with drug use as it affects the elderly; alcoholism in the elderly; how to gain the greatest benefit from a visit to the doctor; the role of the pharmacist; and how medically-required drugs can be taken safely to the benefit of the user.

Employee Assistance Programs: Assists employers in establishing programs which are designed to help employees whose work performance has deteriorated due to dependency on alcohol and/or other drugs, or due to various other personal problems.

Adult Prevention and Education Programs:

Prevention and education programming to meet community requirements, including training for health and social services professionals in the recognition of chemical dependency and the factors which contribute to successful recovery are also provided by Prevention/Education staff of the Women's Centre for Substance Abuse and Community Prevention/Education Unit.

Youth Prevention and Education Programs:

Youth High-Risk Program: A program for adolescents experiencing difficulties associated with alcohol and other drug abuse. The program offers information and education on the effects of chemical use and abuse. Clients are observed to further assess treatment requirements.

Parent Intervention Program: A program designed for parents who are concerned with their child's use of mood-altering substances. The program explains the Foundation's youth programs, and helps parents to understand how a child's drug use and related behaviours impact on the entire family. The program also assists parents in identifying the symptoms of chemical dependency and introduces them to other available community supports. The program is conducted over four evenings on a monthly basis.

Youth Intervention Strategy: This pilot program was developed by the Foundation to address more effectively, specific information and counselling needs of Manitoba high school students. In 1989/90 a pilot group of Manitoba high schools participated in the strategy to work toward providing intervention services for youth affected by alcohol/drug related problems.

Tuning In To Health: A prevention-oriented drug education program that is recommended by Manitoba Education for use with the Chemical Use Section of the Manitoba Health Curriculum. The goal of the program is to reduce future occurrences of problems associated with alcohol and other drug use by young people.

Impaired Drivers Program:

A program for persons convicted of impaired driving offences who are seeking to apply for re-licensing. The program is operated on a fully cost-recoverable basis. Clients are required to pay a fee of $225.00 at the time of assessment.

Assessment Services: An assessment to determine the significance of an offender's chemical use and whether or not the offender requires a referral to an Educational Workshop, High Risk Program or a treatment program. With the offender's authorization, assessment results are reported to the Division of Driver and Vehicle Licensing.

Educational Workshop: A one-day workshop which provides accurate information concerning the use of alcohol and other drugs, how chemical use affects driving and impaired driving laws. Participants are required to examine their own drinking and driving patterns and encouraged to identify alternatives to driving impaired.

High Risk Program: A three-month program of interviews and group sessions to assist clients to increase their knowledge about their own clinical usage of alcohol and to develop plans of action to address specific risk or problem issues. Total abstinence is required for the first six months and other treatment objectives are established utilizing individualized Involvement Agreements.

Non-Residential Treatment Program: A minimum of 20 hours of treatment over a three-month period accompanied by an additional three months of follow-up. The program offers individual and group counselling sessions and focuses on problem-solving and effecting change in the client's life. Group sessions are offered in the evening, while individual counselling sessions are offered during the day.

Awareness and Information:

Research Services: The need to improve programs and to learn more about drug and alcohol use, abuse and addiction is addressed by the Foundation through a research program which employs program evaluation and applied research. External researchers are supported through cooperative efforts and occasional funding. Research reports produced by others are catalogued and made available when feasible.

Uniform Data System: Demographic and service information is collected for all AFM clients and services, and for all agencies funded in part or in whole by the Foundation. This information is made available to decision-makers and others in an effort to assist proper understanding and planning for program development, policy and resource expenditures.

Media Relations: Contact and assistance for the media is offered to better inform the public about alcohol and other drug issues. Background information and informed responses are available and coordinated through a system of authorized spokespersons.

Information Services: Public education and awareness projects are undertaken to better inform the public about chemical substance abuse and the services available in response to it. Displays, pamphlets, brochures and other communication mechanisms are used to provide factual information to decision-makers, related groups and organizations, and the general public.

Library Services: The William Potoroka Memorial Library offers library services free to the public. This includes a book, film and videotape lending service; pamphlets, brochures, posters and other publications on alcohol and other drug problems; over 100 topical files of newspaper clippings, reports and articles to answer specific questions; journals, government documents, bibliographies, conference proceedings and other reference material.

AFM Locations:

BEAUSEJOUR:

Provincial Building
1st Street
Beausejour, MB
R0E 0C0
Phone: 261-1411

Locations Served: Beausejour, LaBroquerie, Lac du Bonnet, Niverville, Pinawa, Pine Falls, St. Pierre, Ste. Anne, Steinbach, Whitemouth and surrounding areas.
